***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Glenn on 9/27/04.

The application has been amended as follows:

In claim 1 (original): line 16, --assembly-- has been inserted after "said latch pin receiver"; line 17, "an deployed position" has been replaced with --a deployed position--.

2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or render obvious a motivation to provide a livestock stanchion latching mechanism having the combination of structural limitations especially a latch pin fixed to the restraining stanchion, the latch pin releaseably connects to a latch pin receiver assembly, the latch pin receiver assembly coupled to a rotatable cam shaft mounted to the frame, wherein the cam shaft is rotated to move the latch pin receiver assembly between a deployed position to engage the latch pin thereby locking the restraining stanchion into the second position and a retracted position to release the latch pin, these along with the rest of other limitations/features as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
